**Subject:** Briefing ready to go forward!  
**Attachments:** early input and econ brief for D Ross.for OWOW review.pptx; early input and econ brief for D Ross\_JH\_KH.comment bubbles.pptx

Final versions of the briefing for OWOW. The "comment bubbles" version has all of our comment bubbles in it still, although all blue/red changed text is in black (one could probably see interim versions using version control feature of SP). The "for OWOW review" version is the clean one, with no comment bubbles.

Kathy will take care of sharing with OWOW mgmt.
